

Visiting Surgeon Program

Visiting Surgeon

The Acumed Visiting Surgeon Program provides a unique opportunity for physicians to visit our facilities to learn about our company and the products we design and manufacture.

Program

This educational experience provides an interactive learning environment that helps promote positive outcomes for physicians and patients. Each program is tailored to leave the physician with a lasting impression of our company and products.

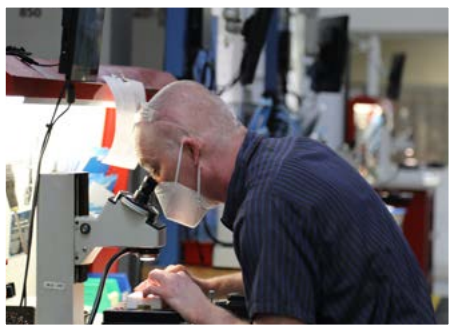

Each visit provides hands-on use of our entire current product line in Acumed's state-of-the-art cadaveric training labs. Surgeons will tour our plants to see Acumed's superior manufacturing process and the attention and detail that goes into making our products. They will also meet with Acumed product managers and design engineers as well as members of the executive team.

We offer world-class education and provide enhanced learning experiences for attending surgeons, fellows, and residents.

The Visiting Surgeon Program is one of the many innovative offerings that enhance the customer experience with Acumed products.

A highlight of the program is an interview in our multimedia studio. Surgeons may be invited to speak about a favored approach, a challenging case, insight found through research, or other topics. The resulting content is featured on our social media and digital channels.

Our Mission

We are engaged and proud “to aid the afflicted through the ingenuity of our minds, the labor of our hands, and the compassion of our hearts.”

Our Vision

We serve highly skilled specialized surgeons who demand comprehensive, high-quality medical devices for patients with simple to complex injuries for optimal outcomes and restoration of function.

Medical Education is a key foundation that enables Acumed to further our mission and fulfill our vision.
