## Acumed OEM: A Passionate Strategic Partner

Acumed Original Equipment Manufacturer (OEM) is a trusted orthopaedic medical device partner providing companies and specialized surgeons with quality products and innovative solutions. By offering a vast array of products, manufacturing excellence, and access to world-class operations, we fill in crucial gaps to bring products to market.

Our state-of-the-art machines, expertise, and passion drive our excellence. Partner with us to achieve new manufacturing heights that benefit patients worldwide!

### Component Manufacturing

Rooted in manufacturing excellence, Acumed OEM offers a wide range of component manufacturing solutions. We use some of the most advanced equipment in the industry and have two facilities, one in Hillsboro, Oregon, and one in Addison, Texas, that manufacture products for use all over the world. Partnering with us means leveraging the core competencies that have solidified Acumed's position as a world-class medical device manufacturer.

The services we offer include:

- ▶ Machining & Forming
- ▶ Finishing
- ▶ Direct Part Marking

### Packaging

Acumed OEM manufactures thousands of products worldwide with numerous packaging requirements. We provide a wide range of sterile and nonsterile packaging solutions to help bring your company's products to market.

#### Sterile Packaging

Our sterile packaging solutions are meticulously designed to meet the strict requirements of the medical industry. At our fully equipped facilities, we ensure your products are safe and receive the highest level of protection throughout the packaging process.

- ▶ Sterile Packaging, Vacuum & Blister Sealing
- ▶ Shrink-wrapping, Boxing, Labeling

#### Nonsterile Packaging

Even if your product does not require sterile packaging, our skilled team ensures its protection and integrity. We are experts in industry best practices and handle your nonsterile products with the utmost care and attention to detail.

- ▶ Automated Nonsterile Bagging
- ▶ Shrink-wrapping, Boxing, Labeling

### Inspection & Metrology

In an industry with high regulatory requirements, it is imperative to work with a strategic partner that employs the most stringent quality standards. Acumed OEM provides numerous inspection and metrology solutions to help your company meet the precise requirements of medical device products that ultimately end up benefiting the lives of the end user, the patients.

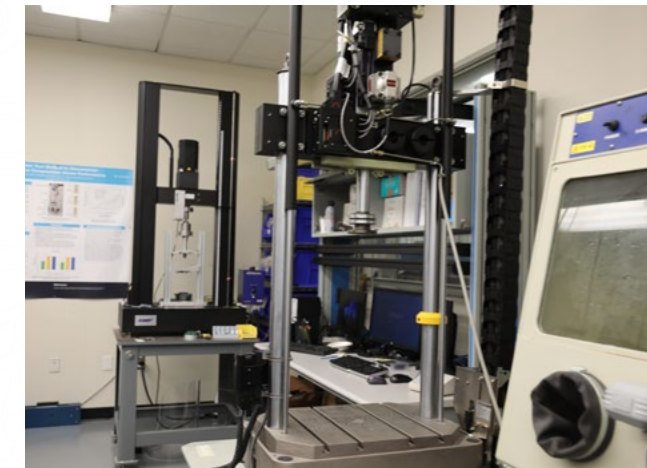

The services we offer include:

- ▶ Automated In-Machine Vision Inspection
- ▶ Automated In-Machine Probe Inspection
- ▶ Coordinate Measuring Machines (CMM)
- ▶ Optical Measurement Capabilities
- ▶ Custom Fixed/Attribute Gauging

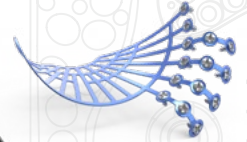

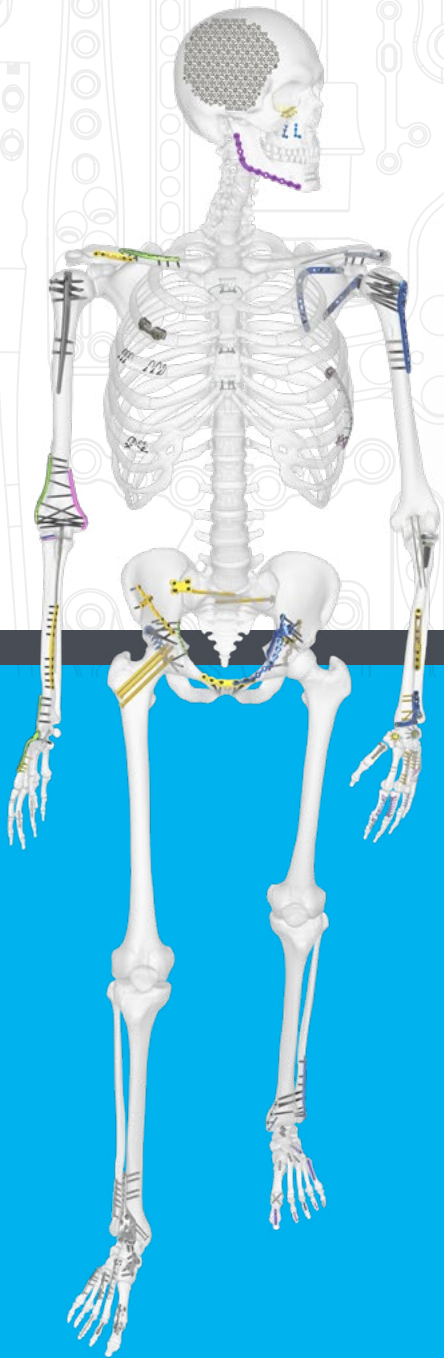

### New Product Design, Testing, & Prototyping

Acumed provides new product design, testing, and prototyping for some of the world's leading medical device companies. With expertise in orthopaedic and craniomaxillofacial implant products from a variety of different materials, Acumed OEM can help bring your company's vision to market.

Acumed OEM distributes everything from high quality titanium orthopaedic products, craniomaxillofacial and neurosurgical solutions, reliable instrumentation, numerous kits and containers, disposable drivers, specialized instruments, and more. All these products are trusted by surgeons in operating rooms worldwide.
